Mendham Township has always been in the leadership of preserving important lands for historic, scenic, environmental reasons. Pitney Farm fits all of the categories. Yes, budgets are tight and we need to be concerned about taxes. Once a decision is made to sell portions of the land no future plans can be made. Furthermore, at some point in our future there will be further agreements with Mendham Borough and Pitney Farm will play an important role in cementing the two communities. This is a bad precedent to take - overturning acquisitions by previous township committees.

This is a true town asset and a solid solution needs to be found that will ensure that it is maintained. What if this "just sell it" approach was taken with the Cider Mill, Ralston Store, the Wick House, Fosterfields, or even Washington Headquarters? Those empowered by the people, need to deliver a solution (other than selling it for development). That is what they were put in place to do. If this is not worth preserving, then what is?

I want to preserve Pitney. I'm tired of hearing we can't raise taxes. We NEED some public facilities in Mendham Township. We are an embarrassment compared to our neighboring towns' facilities for residents. Shameful.

Our tax monies paid to save the historic farm property from the hands of developers.

Well now, with forward thinking and some creative financial leadership, Mendham's historic jewel MUST be saved, preserved and creatively put to use for the citizens - the taxpayers.

Get out of the short-sighted, reactionary thinking mode and go for the grants, figure out some big donor schemes and save the Pitney Farm!

This property was purchased unanimously by a former township committee. The municipally owned section is the most historic dating back to the civil war and as part of the purchase it was surrounded by open space for the benefit of nearby residents and access would only be from Cold Hill Road. Another important benefit in addition to preserving local history is the property would also serve the future needs for community facilities

Pitney Farm is a truly unique asset that could make Mendham Township an even more special town if handled properly. The farm tells the history of Mendham in its architecture & gardens. It should be highlighted and promoted. I am shocked that our town government would even consider selling to a developer. & potentially/probably losing it.

I grew up across the street and spent many a day exploring the property. My sister, brother and I both worked on the farm. My brother did all kind of odd jobs around the place including picking up Christopher Reeve (a relative of the Pitney family) at the airport. The Pitneys were like local royalty. The history of their home should not be destroyed but rather preserved.

I'm signing because I believe wholeheartedly in the preservation of national historic places. As a descendant of pre-American Revolution immigrants, I understand the great importance of leaving historic buildings intact to instill that sense of history that so many young people today lack because of our global mobility to find work. The multi-generational habitation in this building was quite uncommon but extraordinary--the town and state should honor the original agreement to keep the building as an historic landmark. That's one thing about the South--we preserve as much history as we can, and find a way to pay for it and don't give up so easily! So, please honor the agreement and SAVE this building!

I can clearly envision what the outcome will be if Pitney Farms is preserved: this historic property will remain a true representation of the past and true to the character of Mendham. However, if the property is sold and/or the Farm buildings leveled or destroyed, I cannot clearly picture what the future would hold...but the possibilities concern me.

I agree with the sentiments of others: that historic preservation in general is important wherever possible, that Mendham Township is a place committed to open space and historic preservation, and that the Farm and the site could creatively be used for the benefit of the Township.

I hope that in the end the property can be preserved (at least) and restored/improved (if possible).

Pitney Farm, in its entirety, is a truly unique acquisition for this and future generations. I sincerely hope the Township Committee will make the difficult but necessary decision to now provide funding to stabilize the property and continue the evaluation of potential community uses. We should not squander nor minimize the efforts of the Pitney Farms Public Purpose Study Committee which able to engage, pro bono, top world class design firms of Michael Graves, Gensler Associates and Bohler Engineering to produce a well constructed report with solid recommendations.

Mendham has special character for the large number of pre-20th century buildings. Preserving Pitney will give us an pre-revolutionary campus in the center of town that we will all be proud of and provide a focus for the town's historic image.

It's important to maintain the land for future municipal uses even if it's mothballed or reconstructed to preserve the look with new construction.

The town needs a new library and all avenues should be explored to bring in external funding.
